

# SIGHT WORD APPS

There are many, many sight word apps, some of which allow you to type in your own words – which would be great when working with the ball words for kindergarten and early first graders!

Here are some of my favorite free Dolch sight word apps:

-  **Sight Word Lists:** Learn to read flash cards and games
  - Uses the Dolch Sight Word lists, to choose between preschool, kindergarten, first grade, second grade, third grade and nouns. This app also allows you to make your own lists.
-  **Sight Word Flash Cards:** (search Sight Cards)
  - Uses the Dolch Sight Words lists, so you can choose between pre-primer, primer (kindergarten), grade 1, and grade 2. You can choose to listen to the words and read them, or play a game where 4 words are given and the student has to choose the correct word that is said aloud to them.
-  Sight Words – Dolch & Fry
-  Sight Word sentences for Kindergarten and first grade.
-  **Sight Words Match:** Uses the Dolch Sight Word lists.
  - Students can choose their sight word level and play a matching game to help reinforce their words. Pre-primer, primer and grade 1 levels are free – grades 2 and 3 are available for purchase.
-  **Sightwords Space Game**
  - Students choose from different sight words and then trace the word, choose things that are associated with that word and listen to a sentence with that word in it.
